COD-Warzone Custom Ruleset and Information

Using Warzone crossplay will let you play with friends on any console or platform. It doesn't matter if you're on PS4, PS5, Xbox One, Series X and PC - **everyone can play together with Warzone crossplay**.

Player Eligibility: All players participating in COD-Warzone competitions must have an active account in good standing, and their username easily found through discord to facilitate ease in communication.

Only registered team members playing under their own account are allowed to play for a Team. We will be running squads (4 team members) - you can swap out one player per match.

Basics: We will be using **Rebirth Mini Royale Quads** (private, custom game) each week and through the post-season. We must have **23** players to launch a private match.

In the event that we do not have at least 23 players, you will join a regular **Verdansk - Battle Royale Quads**. You will have three hours to complete three games and provide the post-game screenshots in that same allotment of time.

Series Matches:
> 1. Matches will be best-of-three (3) during the regular season.
> 2. Matches will be best-of-ten (10) for post-season play - one single day of play.

We will use scoring below to determine the team winner for Fall 2021 Warzone.

How To Play: Players will join a custom lobby, hosted by the admin of KCCEC and those players will join their team in game. Once everyone is in discord and we can validate that everyone is ready to play (and we aren't missing anyone, we will begin the map. Your goal is to get as many kills and the best placement possible, as 1 point is awarded for each kill and up to 10 points based off of your placement. Cross platform must be turned on. After the game is completed, there will be a short intermission between games so that everyone can submit scores and get ready for the next match.

Scoring:

1 point awarded per kill

Placement Points:

10 points for 1st place

8 points for 2nd place

6 points for 3rd place

4 points for 4th place

2 points for 5th place

Score Submissions: After each game is played, teams must take a photo of their kills and placement. This can be done in game or with the after action report. You must submit your photo evidence in the tournament you are registered for. Example: 10 combined kills + 6 points for 3rd place = 16 points.

Results: The team with the best total score at the end of the 3 games will be the winner of that week and announced on the tournament page. After the 3rd game concludes, players will have 15 minutes to submit scores. If you do not submit your scores to discord, you will get zero points.

Ties: If a tie occurs, the winner will be the team with greatest total damage for their 3 games. (Total damage calculated by adding up team damage from all 3 games).

Disclaimer: Rules and Tournament structure are subject to change without notice. Please pay attention to discussions via email and discord for the most up to date information.
